College of Fine Arts Interdisciplinary Courses

Note on Course Numbers
Each Carnegie Mellon course number begins with a two-digit prefix which designates the department offering the course (76-xxx courses are offered by the Department of English, etc.). Although each department maintains its own course numbering practices, typically the first digit after the prefix indicates the class level: xx-1xx courses are freshmen-level, xx-2xx courses are sophomore level, etc. xx-6xx courses may be either undergraduate senior-level or graduate-level, depending on the department. xx-7xx courses and higher are graduate-level. Please consult the Schedule of Classes (https://enr-apps.as.cmu.edu/open/SOC/SOCServlet) each semester for course offerings and for any necessary pre-requisites or co-requisites.

62-002 CFA Elective
Intermittent: 9 units
TBA

62-010 Pittsburgh Filmmakers
Fall and Spring: 9 units
Any of Pittsburgh Filmmakers full semester course offerings are available for registration through the CFA Dean's Office. Visit http://filmmakers.pf pca.org/ for listings. Registration can only be done on or after your scheduled registration day. Spaces are limited. Stop by CFA 100 or send an email to sdroven@andrew.cmu.edu for details and to register.
Course Website: http://filmmakers.pf pca.org/

62-102 Modern Dance Workshop
Fall and Spring: 6 units
A modern dance class based on the philosophy of the Martha Graham technique. The class is designed to encourage exploration and discovery of the roots of physical movement and control. The class also covers fundamental and technical aspects of modern dance as a classical performing arts form.

62-105 Exploring Pittsburgh
Fall: 6 units
TBA

62-106 Architecture and the Arts
Fall: 9 units
This course explores some of the many inter-relationships and shared belief systems between architecture and the arts. We'll look briefly at the common roots, disparate origins, and intertwined histories of the two, and investigate overlapping terms like Composition, Expression, Rhythm, Form, Meaning, and Representation that can be found across the arts. We'll also ask how the discipline of architecture has been, and can continue to be framed as a fine art, but also acts as a service profession, a political tool, a technical enterprise, a research endeavor, or as a mode of cultural discourse. The course will be structured around a close reading of a series of drawings and writings that reveal architecture's constantly changing engagement with art, culture, society, and related disciplines as it struggles between autonomy and engagement. It will involve slide lectures, readings, frequent "reading reports" by students, as well as discussions and debates. It serves as an "Introduction to the Art of Architecture" course for a general audience, as well as a critical introduction to architectural thinking and theory for architecture majors.

62-110 Passport to the Arts
Fall and Spring: 9 units
Exploring Audience and Ideas in the Arts: "Passport" is an introductory level course that explores the philosophy of aesthetics through direct attendance at performances and exhibitions. The course is constructed in modules that represent each school within the College of Fine Arts (architecture, art, design, drama and music) building toward cross-disciplinary practice. Each module contains a guest lecture, event attendance, and follow-up discussion which serve as points of entry into each discipline as well as points of comparison within the arts as a whole. These three components provide a direct link between theory and practice allowing students to gain a critical vocabulary to discuss their experiences. Outside of class, supplementary readings, audience participation, and written reflections provide an opportunity for students to use course material to enrich their own aesthetic practice. Ultimately, students are asked to consider their roles as an artist: within their discipline, within the arts, and within the broader community. This course concludes with a final symposium/exhibition of participating students.

62-122 Digital Media I
Fall: 6 units
TBA

62-123 Digital Media II
Spring: 6 units
TBA

62-125 Drawing I
Fall: 6 units
TBA

62-126 Drawing II
Spring: 6 units
TBA

62-135 The Basics of Self-Producing: How to put up your show in NYC and get it reviewed
Fall and Spring: 6 units
For any actor/writer/director/theatre artist in New York City, the time between jobs can feel stressful and frustrating. Self-producing is the quickest way to get your work on stage without permission from anyone else or having to adhere to anyone else's restrictions. From blurbs to budgets to rehearsal space to press releases to equity paperwork, this course covers everything you need to know in order to get your work produced and noticed in New York City without breaking the bank. This course will draw from readings on independent theatre, interviews with working independent producers in New York, and the working experience of Anderson Cook, author/producer of The Disembodied Hand That Fisted Everyone to Death - the Musical!, Blantly Blaine, Pop Punk High, Donny and Kelly Save the Slumber Valley ASPCA, and more - all produced and reviewed in NYC.

62-141 Black and White Photography I
Fall and Spring: 10 units
This course explores digital photography and digital printing methods. By semester's end students will better define their individual voices and know the aesthetics of seeing with a camera. The course concentrates on photography as a fine art — what is unique to it and the concerns that are shared with other visual arts, such as composition, tonal values, etc. and aims to equip students with an understanding of the formal issues and the expressive potentials of the medium. Lab fee and 35mm manual camera required. Each student is responsible for the cost of paper and film.
Course Website: http://cfaphoto.cfa.cmu.edu/classesf17.html

62-142 Digital Photography I
Fall and Spring: 10 units
This course explores digital photography and digital printing methods. By semester's end students will have knowledge of contemporary trends in photography, construction (and deconstruction) of photographic meaning, aesthetic choices, and the use of color. Students will learn how digital cameras work, proper digital workflow,RAW file handling, color management and Adobe Photoshop. Through the combination of the practical and theoretical, students will better define their individual voices as photographers. No prerequisites. Digital camera required.
Course Website: http://cfaphoto.cfa.cmu.edu/classesf17.html

62-145 Photojournalism
Fall and Spring: 10 units
TBD
Prerequisites: 62-193 or 54-194 or 54-193
Prerequisite: Introduction to Screenwriting, or instructor permission.

62-150 IDeATe Portal: Introduction to Media Synthesis and Analysis
Fall: 10 units
Technologists, artists, and designers are engaging in new, interdisciplinary modes to consume, create, and reuse media. To do this, they thoughtfully collaborate and critically reflect on media creation, distribution, participation, interaction, and how media affects the audience. In this course, students will challenge themselves to work in these new modal contexts by thinking critically in a genre of exploration. They will formulate the intent of their creative work, articulate relationships to art/design practice and theory, and respond insightfully to creative, media-rich outcomes. The class will introduce core concepts through foundational texts, in-class exercises, collaborative projects, and group critique. Through hands-on media exploration, students will ground concepts such as embodiment, emergence, composition, participatory interfaces, and mediated experiences. Section A will be an Introduction to Textile Media. Section B, will be an Introduction to Mediascapes: 2D to 3D Spatial Environments. Section C will be an Introduction to Digital Storytelling + Archives. For more detail on these sections, please visit https://courses.ideate.cmu.edu/62-150/f2018/.
Course Website: https://courses.ideate.cmu.edu/62-150/f2018/

62-165 Mutable Landscape:
Intermittent: 10 units
With camera in hand, students will explore, document and invent a sense of place in Pittsburgh. Informed by photographic history and landscape studies, students will develop their own portfolios of digital prints. As a CFA interdisciplinary photography course, students will be encouraged to consider their photographs in the medium of their home department, and in some cases as a starting point for projects in other materials. No prerequisites.

62-175 Descriptive Geometry
6 units
This is a manual construction course for solving problems in three-dimensional geometry through working with two-dimensional planes using basic mechanical drawing tools. The course covers basic concepts of descriptive geometry; solving problems involving lines and planes in space and their spatial relationships; rotations in three dimensions; locating points and tangents on solids and surfaces; intersection of solids; shades and shadows; perspectives; and development of surfaces.

62-193 Intro to Screenwriting
Intermittent: 9 units
Ever watched a terrible movie and thought “I can do better than that?!?” Or seen a beautiful film and had the opposite reaction: “I could never do that!” Then this is the class for you! This practical skills course will provide students with the tools they need to construct compelling, image-driven screenplays. Students will be writing throughout the semester, ultimately preparing them to complete a polished script of a short film as a final project. Assignments will include reading masterwork screenplays for in-class analysis. Class time will also be dedicated to roundtable readings & discussions of each other’s writing.

62-194 Advanced Playwriting
Spring: 9 units
In this class students will fine-tune their individual voices as writers and break outside the conventional notions of what a play should be. Students will read texts by playwrights that experiment with structure and theatricality, partake in writing exercises meant to tap into creative impulses, and receive feedback on their plays throughout the semester.

62-195 Writing Satire for the Stage
Fall: 9 units
In this course, students will experiment with writing satire through creating sketches, plays, and other methods of performance. Students will read plays by Branden Jacobs-Jenkins, view sketches from The Second City, and see performance art by Young Jean Lee. The course will provide students with the basis of creating different forms of satire in ever-changing political climates.

62-196 Advanced Screenwriting
Spring: 9 units
This course is designed to give writers a variety of tools they can use in writing or rewriting a current project full-length screenplay. There will films assigned to watch and analyze. Either a first draft or a rewritten version of a full length screenplay is to be completed by the end of the semester. Prerequisite: Introduction to Screenwriting, or instructor permission.
Prerequisites: 62-183 or 54-194 or 54-193

62-207 IDeATe: Variational Geometry I
Fall: 6 units
This course will introduce concepts and strategies for the modeling and development of complex computational geometry for 3D printing purposes and introduce algorithms utilizing the Rhinoceros McNeel platform and Grasshopper plugin. This course is intended for students with no or little 3-D modeling skills to advance their abilities in modeling, digital prototyping and visual communication.
Course Website: http://ideate.cmu.edu/about-ideate/departments/college-fine-arts-ideate-variational-geometry-i/

62-225 Generative Modeling
Fall and Spring: 9 units
TBA

62-240 Unfolding Environments: The Intersection of Person and Place
Fall and Spring: 10 units
This course will use photography to explore our surrounding environments. Assignments will focus on editing and image sequencing, combining the practices of portraiture, landscape, still life and observational photography to create narrative work that explores the complex connections between people, objects and the spaces they inhabit. Throughout the course, students will strengthen their understanding of the ways in which these tangible and abstract elements of our environments work together, while also developing their technical abilities by working with color and black and white images and varied light sources. Students will also learn approaches to project development and digital workflow. Discussions, readings, gallery visits and critiques will provide an outline for completing assignments. The class will study work and books by notable and emerging figures in the medium, including Robert Adams, Rineke Dijkstra, Carolyn Drake, Roy DeCarava, Milton Rogovin, Judith Joy Ross, Rinko Kawauchi, Alec Soth, Larry Sultan, Carrie Mae Weems and Susan Worsham. Required readings will include essays and short stories by Wendell Berry, Rebecca Solnit, Robert Walser and Albert Camus.

62-241 Black and White Photography II
Fall: 10 units
Black and White Photography II allows you to gain experience with medium and large format film cameras that aren't available at many universities. View cameras remain the state of the art in control and quality for both analog and digital workflows; knowing how to use one is a very valuable professional skill. You can make stunning large-scale prints using either darkroom or inkjet processes; imagine the resolution of an 8x10 or 11 x14 inch "sensor" and you begin to see the potential of the view camera. This course emphasizes aesthetic development and personal artistic growth through individual tutorials and group critiques. As an advanced student, you have access to an unusual assortment of panoramic and pinhole cameras that will change the way you make photographs, revealing unknown perspectives. Additional topics include digital process through negative scanning and inkjet printing, advanced monotone printing methods, and a focus on exhibition and folio presentation. Cameras will be supplied for this course. Prerequisites: As listed or consent of instructor.
Prerequisites: 51-265 or 60-141 or 62-141

62-245 Portrait Photography
Intermittent: 10 units
Portrait Photography explores the emotional and visual process of collaboration between subject and photographer that creates a photograph. We use cameras of all formats and levels of sophistication to create portraits in the studio and on location. Each photographer is challenged to find and exploit available light, and create artificial light to complete his or her vision. The class will explore a wide range of digital and darkroom strategies to support and add richness to their final prints. Through film and video photographers will meet some of the masters of this form like Arbus, Newman, Avedon, and Penn. Together we will take advantage of any opportunities to visit exhibitions and photographer's studios. Lab fee required. Prerequisites: As listed or consent of instructor.
Course Website: http://cfaphoto.cfa.cmu.edu/classes/f17.html
62-247 Introduction to Hot Glass I
Fall and Spring: 3 units
In this introductory Hot Glass I class, you will learn to gather molten glass from the furnace, and then shape it into various forms from paperweights to simple blown shapes such as cups and bowls in clear glass. The instruction will focus on a team approach to glassblowing, with an emphasis on safety, proper tool use, basic techniques, and materials. You'll never drink from a glass again without appreciating what went into making it! This class is appropriate for students with limited or no hot shop experience. You may also wish to take this class a second time in order to continue to develop and refine basic skills before moving on to Hot II. The class fee includes 1 hour of open studio time per student (2 hours with a partner), so that students can become familiar with the studio and learn the simple process of studio rental outside of class hours. Each time you take it, you will gain confidence and skill as your passion for glass grows. Registration for Pittsburgh Glass Center classes can only be done on or after your scheduled registration day. Spaces are limited. Registration is done on a first come, first served basis. Please go to CFA 100 to register. Course fee is $287.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.org/

62-250 Beginner Beadmaking
Fall and Spring: 3 units
If you’re fascinated by baubles, bangles and beads, this class is for you. Many beads will be made over the course of 8 weeks, as you learn the basic skills of heating moretti (soft) glass, applying it to a mandrel, then using gravity and tools to shape it. Intermediate students will be shown a number of techniques to take their beads to the next level. Everyone will be shown encasing, dots, frits, trails and more. Class tuition includes 2 hours of open studio time per student to be used during the same class session. This will help students become familiar with the studio and learn the simple process of studio rental outside of class hours. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $175. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

62-251 Pendant Passion
Fall and Spring: 3 units
Spend 8 weeks creating your own collection of unique Borosilicate pendants. You will melt and manipulate glass while learning a number of different basic skill building exercises while creating solid foundation. Some of the techniques covered include compression, donut hole, dot stacks, wrap and rakes, and more. This class is great for beginner or those with experience looking to hone in on their inner pendant. Class tuition includes 2 hours of open studio time per student to be used during the same class session. This will help students become familiar with the studio and learn the simple process of studio rental outside of class hours. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $175. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.or

62-255 Enamels + Powders = Imagery
Intermittent: 3 units
Layer screen printed and sifted powders to produce fused panels of beautiful imagery. Traditional imagery techniques in the form of enameling will also be covered. This class is all levels, but those with experience will also benefit. Class tuition includes 1 session of open studio time per student to be used during the same class session. This will help students become familiar with the studio and learn the simple process of studio rental outside of class hours. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to register. Spaces are limited. Course fee is $217.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

62-256 Introduction to Coldworking
Fall and Spring: 3 units
Learn about all of the equipment in the cold shop including belt sanders, flat grinders, dremels, lathes, the sandblaster, and the diamond saw. These tools can be used to create intricate patterns and textures on the surface of a variety of glass objects. You will complete several personalized projects. Students with no prior glass experience will be provided items to cold work, but students with eisting work they want to refine from other studios are welcome as well. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please register for this course in person at CFA Room 100. Spaces are limited. Course fee is $122.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

62-265 Alternative Photo Processes
Spring: 10 units
This experimental photo-printmaking hybrid introduces students to 19th century, non-silver and alternative photographic printing techniques. One of a-kind, hand-applied processes include: Van Dyke, cyanotype, salted paper, POP, albumen, platinum & palladium and bromoil. Students will produce large format imagery by use of traditional large format shooting, analogue negative enlarging and/or digital negative methods. In addition to the printing techniques, the class considers how to unite process with concept. Prerequisites: 51-265 or 60-141 or 62-141

62-275 Fundamentals of Computational Design
Fall and Spring: 9 units
As analog mechanisms; as metaphors; as bodily extensions or prosthetics; as material systems; as building envelopes; as partners or slaves of humans. This course takes computers outside the box and outlines a journey of discovery revealing computation as the connective tissue encompassing multiple facets of architecture and design culture and experience. Addressing conceptual and practical aspects of the relationship between computation and design, the course explores the fundamentals of generative and rule-based systems for designing and making, environmental simulation and responsiveness, and basic approaches to creative data processing, visualization, and materialization. The course offers a holistic view of computation, exploring the different roles computing plays in the design of our artificial environments. The course is driven by themes, each combining state of the art examples, historical insight, and hands-on computational exploration. Prerequisite: 48-100

62-306 Music-Cinema-Culture
Fall: 9 units
This course reviews the first 100 years of the twentieth century's only original art form whose advent has brought about tremendous social and cultural changes. Students screen selected films, learning first the basics of film theory, cinema's working structures and the function of music. Ultimately, they analyze, in the form of a written essay, the function and value of the music in a particular film and the cultural impact such music has had on society. The work of the course involves attendance at screening and active participation in analytical discussions. Students are expected to present one report consisting of a critical review of the reading assigned. A final examination dealing with some film theory, music, and cultural politics will conclude the course.
62-314 The Art of Personal Finance
Fall and Spring: 6 units
Money is an inevitable part of our everyday lives. Managing the money we earn and living within our means is essential to ensure that we have the freedom to do what we want to do with our lives. However, even if we successfully eliminate debt and save for the future, true financial freedom will not exist unless we have a plan to guide us on our way. In this course, students will create a simple one-page financial plan that they can use to guide them through their next several years as they cultivate the skills that will ensure their artistic success. Additionally, they will develop the tools needed to support the execution of the plan and create a sourcebook of information they can refer to in the future as their lives (and their financial plans) change. For DRAMA students only.

62-315 InterBreeding Architecture: Computational Techniques for Shaping the Environment
Fall: 9 units
InterBreeding Architecture (formally Ecologics) is a project based design-research seminar that investigates adaptive dynamic behaviors inspired by natural processes and biomimetics as a basis for design ideas. Students are introduced to computational design thinking and digital fabrication, using contemporary parametric modeling to incorporate environmental information into iterative design process and form making. The objective is to speculate about translation of performative contingencies into functional morphologies informed by data sets and simulation. We engage design processes in which systems’ performance metrics underpin creative exploration of organization and form. The seminar results in the design and prototype of an individually proposed project. Students are immersed in digital parametric tools and contemporary digital fabrication processes, including 3D printing, CNC milling, vacuum forming and mold casting.

62-325 View Camera
Intermittent: 10 units
The nature of a 4x5" view camera alters both the process of making a photograph and the qualities of the resulting image. The slow, even cumbersome, process of photographing with a large format camera encourages a methodical, studied approach. The larger negative size and the ability to control the exposure and development of each sheet of film make possible an image of extraordinary clarity and detail. Through a series of exercises followed by a self-selected project, students in this class will learn the technical aspects, and master the use of, the view camera. Topics include: perspective and focal plane control, bellows extension factor, and basic B&W sheet film handling and processing. Students should enter this course already possessing a working knowledge of photographic processing and printing. Prerequisites: 62-141 and any 200 level photo course or consent of instructor. Prerequisites: 62-245 or 62-381 or 62-337 or 62-326 or 62-265 or 62-241 or 62-205 or 62-141

62-326 Photographic Narrative
Intermittent: 9 units
Most photographs tell stories. We see photographs in newspapers, magazines, snapshot albums, on the web, in books, and in posters. In these contexts photographs often work with words to convey meaning, whether they are shown with captions, news stories, or just with titles. Photographs can work without words, too, to create purely visual narratives. In this course, students will make two series of photographs: one that is fiction, and one that is non-fiction. In addition to making photographs, students will make possible an image of extraordinary clarity and detail. Through a series of exercises followed by a self-selected project, students in this class will learn the technical aspects, and master the use of, the view camera. Topics include: perspective and focal plane control, bellows extension factor, and basic B&W sheet film handling and processing. Students should enter this course already possessing a working knowledge of photographic processing and printing. Prerequisites: 62-141 and any 200 level photo course or consent of instructor. Prerequisites: 62-245 or 62-381 or 62-337 or 62-326 or 62-265 or 62-241 or 62-205 or 62-141

62-330 Filmothea: Seminar in Film Music
Summer: 9 units
The first 100 years of the 20th Century’s only original art form, whose advent has brought about tremendous social and cultural changes. Students view selected films, learning first the basics of film theory, cinema’s working structures and the function of music soundtrack. Ultimately, they are able to analyze in written essays and class discussions, the function and value of the music in a particular film and the cultural impact such music has had on society. The work of the course involves attendance at screening and active participation in the following analytical discussions. Students are expected to present their work reports on films/readings and sustain a final oral presentation.

62-332 Teaching and Learning
Spring: 6 units
In this course, students will learn about effective strategies for teaching architecture and the built environment. Topics include the cognitive differences between novices and experts, instructional techniques, and goal alignment. As part of the course work, each student will implement these teaching strategies to design and teach a lesson. Elements of developmental psychology, learning theories, and classroom practices will inform the architectural education lesson. Teaching and learning techniques can be generalized for communication with clients, practice, and the community.

62-347 Hot Glass II
Fall and Spring: 3 units
Now that you’re hooked on hot glass, how do you keep the momentum going? By enrolling in Hot II, you will become more proficient working with glass. Refine and vary the cup and bowl shape in the first few weeks before moving on to more complex shapes. Explore basic methods of color application and learn how to troubleshoot common problems. The class fee includes 1 hour of open studio time per student (2 hours with a partner). This will allow you to find your own projects. Plans for the class include a further exploration of blowing techniques, a variety of primary glass colors and textures, and a focus on the process of studio rental outside of class hours. Hot I, 24 hours experience, or permission of the instructor required. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $287.50. Not eligible for PCHE cross registration. Course taught at the Pittsburgh Glass Center. Prerequisite: 62-247

Course Website: https://www.pittsburghglasscenter.org

62-358 Art and Biology
Intermittent: 9 units
A studio-laboratory art-making course designed to explore interactions between art and biology. It is an opportunity for students interested in interdisciplinary concepts to work both in a studio art environment and a biological laboratory. Students have the opportunity to experiment creatively with scientific media such as electron and video-probe microscopy.

62-360 Photographers and Photography Since World War II
Spring: 9 units
Invented in 1839, photography was a form of visual expression that immediately attracted a large public following. Starting around 1900, photography was practiced with two dominant strands. One of these firmly believed in the power of photographs to provide a window on the world, and was led by Lewis Hine, whose documentary photographs for the National Child Labor Committee helped to ameliorate living and working conditions for thousands of immigrant children. The other strand adhered to the philosophy of Alfred Stieglitz who adamantly affirmed that photographs were first and foremost reflections of the soul and were art objects, equal to painting, drawing and sculpture. These two schools of thought guided photographers throughout the twentieth century. This course explores in depth the tremendous range of photographic expression since World War II and examines in particular the contributions of significant image-makers such as Helen Levitt, W. Eugene Smith, Robert Frank, Diane Arbus, Garry Winogrand, Charles "Teenie" Harris, Cindy Sherman, Carrie Mae Weems, Nan Goldin, James Nachtwey, and many others. Classes include a slide lecture, student presentation, and video segments that introduce a focused selection of images by major photographers in an attempt to understand their intentions, styles, and influences.

Course Website: http://cfaphoto.cfa.cmu.edu/classes/f17.html
62-361 Trajectories in Photography: From its Prehistory to 1945
Fall: 9 units
This course explores the development and practice of photography in relation to the massive social and political changes of the 19th and early 20th centuries. Topics will address modernity’s embrace of the visual, photography’s role in the rationalization of geographies and peoples, the promises of photography as a new technology; the position of photography in relation to developments in art; the emergence of photojournalism and documentary photography and the use of photography for advocacy; photography in relation to mass media; the photography of spirits and costumed animals. The course draws from various disciplinary perspectives including art history, anthropology, history, and science and technology studies. The course will include instructor lecture and student presentation. Class discussion will be an integral aspect of the class. No prerequisites.

62-371 Photography, The First 100 Years, 1839-1939
Fall: 9 units
Photography was announced to the world almost simultaneously in 1839, first in France and then a few months later in England. Accurate " likenesses" of people were available to the masses, and soon reproducible images of faraway places were intriguing to all. This course will explore the earliest image-makers Daguerre and Fox Talbot, the Civil War photographs organized by Mathew Brady, the introduction in 1888 of the Kodak by George Eastman, the critically important social documentary photography of Jacob Riis and his successor, Lewis Hine, the Photo-Secession of Alfred Stieglitz, the Harlem Renaissance of James VanDerZee, the precisionist f64 photographers Ansel Adams, Imogen Cunningham, and Edward Weston, and other important photographers who came before World War II. The class will be introduced to 19th century processes, such as the daguerreotype, tintype, and ambrotype, as well as albumen prints, cyanotypes, and more.

62-375 Large Format Photography: The Antiquarian Avant-Garde
Intermittent: 10 units
This course takes part in the anti-digital movement by exploring the roots of photography. Students will shoot with an array of large format cameras and use 19th and 21st century processes to create one-of-a-kind photographic imagery. Course topics include view camera techniques, experimental printing processes, pinhole camera-less photography, and contemporary tintypes. Prerequisites: As listed or equivalent or consent of instructor. Prerequisites: 60-141 or 62-141

62-376 Meaning in Images
Intermittent: 4.5 units
Images abound in our culture. This course takes a critical look at many different kinds of photographic images to understand how they operate in our culture to inform, persuade, and entertain various audiences. The content for this course will be generated from looking at, thinking about and discussing issues discovered while studying well-known to lesser-known images that range from photographs used in ad campaigns, to photographs that are used in scientific representation, to snapshots in family photo albums, to photographs that are used to show social injustices, to photographs that exist in museum collections. Readings will be assigned and short writing exercises will be required throughout the semester. In addition, photography assignments will be given. Design majors will have preference. Requirement: a digital camera.

62-418 Theater Architecture II
Spring: TBA
Prerequisite: 62-408

62-420 Aesthetics and Critical Judgement
Fall: 6 units
In this course, we will examine the question of how one judges a work of art. The course will provide an overview of the history of aesthetics in the Western tradition, and in the process we will examine the central questions of: defining beauty, evaluating the artistic object, determining what external factors are relevant to aesthetic judgments (time, culture, biography), and analyzing the inter-relationships between artist, audience, and artistic object. Beyond the knowledge gained, course objectives will include the cultivation of analytical skills in evaluating artistic expression and aesthetic theory, and the development of expository writing and speech skills in aesthetic analysis.

62-442 All the Pattern
Intermittent: 3 units
In this class we will introduce multiple color techniques to help you learn how to create uniquely patterned glass. Students will learn a variety of pattern bar techniques and also harness the heat of the vitriloop to create a host of fused platters or decorative wall hangings. Students will be allotted a small color credit to their PGC account in order to become familiar with the simple procedure of purchasing materials for studio rental outside of class. Introduction to Fusing and Slumping or 24 hours of fusing experience with permission of the instructor is required. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $217.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.org

62-443 Intermediate Fusing
Intermittent: 3 units
Perfect your glass cutting skills and become more knowledgeable while revisiting ideas and techniques from Introduction to Fusing and Slumping. Learn new ways to make your work unique by exploring color, creating your own art glass and learning about patterns while continuing to explore the scientific properties of glass and why it behaves the way it does. Basic materials are provided. Students will be allotted a $15 materials credit to use during this class session in order to become familiar with the simple procedure of purchasing materials for studio rental outside of class. Introduction to Fusing and Slumping or 24 hours of fusing experience with permission of the instructor is required. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $217.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.org

62-444 Scratch the Surface: Color Techniques
Intermittent: 3 units
Immerse yourself in a world of endless techniques of color applications. Students will begin building a solid foundation in flameworking while focusing on wrap & rake, pin-wheel designs, dot stacks and much, much more. While growing comfortable behind the torch a number of items will be made: marbles, pendants and small sculptures. Join us & get your creative juices flowing! students will be allotted a small color credit to their PGC account in order to become familiar with the simple procedure of purchasing materials for studio rental outside of class. Flame I, 24 hours experience or permission of the instructor is required. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $175. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

62-445 Stained Glass Table Lantern
Intermittent: 3 units
Over the course of 8 weeks, you will create a three-panel stained glass table lantern using the Tiffany foiling method. This class is a great start for beginners. It will cover all the basics of stained glass while also offering a new approach for those with previous stained glass experience. Students will choose from preselected patterns that match their skill level and will leave the class with a finished project that will light up any room. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $217.50. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.org

62-446 Hot Glass III
Fall and Spring: 3 units
In this class, you will be encouraged to focus on techniques that interest you as a developing glass artist while still receiving direction and support to refine basic skills and methodology. Learn about a broad range of more complicated techniques including use of solid color, mold-blowing, and compound shapes as you create unique vessels. This class can be repeated as content will vary by session. 48 hours hot glass class/workshop experience, or permission of the instructor is required. Basic materials provided and students will be allotted a small color credit to their PGC account in order to become familiar with the simple procedure of purchasing materials for studio rental outside of class. Registration takes place in CFA 100 on or after your scheduled registration day and is done on a first come, first served basis. Space is limited. Registration is first come, first served. Course fee is $287.50. Classes are taught at Pittsburgh Glass Center
Prerequisite: 62-347

Course Website: https://www.pittsburghglasscenter.org
62-447 Hot Glass Open Projects
Fall and Spring: 3 units
There will be no weekly demonstration by the instructor. Students in this class will be encouraged to pursue their own ideas and maximize the available work time each week. Students should come to class with projects in mind and questions for the instructor. 48 hours hot glass class/workshop experience required, or by permission of the instructor. Basic materials provided. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Not eligible for PCHE Cross Registration. Course taught at the Pittsburgh Glass Center. Prerequisite: 62-347

62-450 Flame I
Fall and Spring: 3 units
A great combination class to explore variety in the flame shop. You will work with both Molten Core and Borosilicate (hard) glass while learning the fundamentals of flameworking. Begin with a solid rod of glass, melt it into a molten ball to create and manipulate little treasures in the flame such as beads, pendants, marbles and sculptures. Over the course of 8 weeks color application, hand control and annealing will be covered, as well as one on one troubleshooting. The class fee includes 2 hours of open studio time per student, so that students can become familiar with the studio and learn the simple process of studio rental outside of class hours. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Spaces are limited. Course fee is $175. Not eligible for PCHE cross registration. Course taught at the Pittsburgh Glass Center.

Course Website: https://www.pittsburghglasscenter.or

62-452 Flame II
Fall and Spring: 3 units
In Flame 2 things begin to flow more naturally, hand and glass control, multi-tasking and familiarity with techniques. This class will assist in tightening skills, as well as discovering new techniques including work with borosilicate tubing, color applications and the use of a hand-torch. Both group and one-on-one demonstrations will be given in each class as students work independently on their interests. Find your focus and push the limits! Students will be allotted a $15 materials credit to use during this class session in order to become familiar with the simple procedure of purchasing materials for studio rental outside of class. Flame 1, 24 hours of flameworking experience, or permission of the instructor is required. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. There is a $175 Course Fee. Spaces are limited. Not eligible for PCHE Cross-Registration. Course taught at the Pittsburgh Glass Center.

62-453 Introduction to Fusing and Slumping
Fall and Spring: 3 units
Fusing has many dimensions even though you are working with flat glass. Harness the heat of the kiln and use a wide spectrum of glass materials to create an array of functional works of art. By exploring multiple techniques including the difference between full and tack fuses, kiln carving, mosaics, faux murini and string cutting, you will be comfortably fusing in no time. Kiln theory, glass compatibility, bubble control, kiln programs, cold working and more will be covered. The class fee includes 2 hours of open studio time per student, so that students can become familiar with the studio and learn the simple process of studio rental outside of class hours. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please go to CFA 100 to sign up. Courses are limited. Course fee is $217.50. Not eligible for PCHE cross registration. Course taught at the Pittsburgh Glass Center. Prerequisite: 62-453

62-456 Fused and Slumped Glass-Phase II
Fall and Spring: 3 units
We will focus on perfecting our glass cutting skills and knowledge while revisiting ideas and techniques from introduction to fusing and slumping. This class will focus on your ideas and desired finished projects while raising the caliber of work you create. New techniques will be discussed as student designs require. 24 hours of fusing class/workshop experience required, or permission of the instructor required. Basic materials provided. Registration can only be done on your scheduled registration day and is done on a first come, first serve basis. Please register in person at CFA 100. Spaces are limited. Course Fee is $205. Not eligible for PCHE cross registration. Course taught at Pittsburgh Glass Center. Prerequisite: 62-453

62-459 Intro to Stained Glass
Fall and Spring: 3 units
Learn the Tiffany method of stained glass while creating your very own stained glass panel from a variety of patterns and glass. Students will learn the basic skills of cutting and shaping sheet glass, foiling and soldering. An understanding of these skills is critical to success and by the end of the class you will feel confident to continue with your new found art form. Registration can only be done on or after your scheduled registration day. Please stop by CFA 100 to register. Registration is first come, first served. Course fee is $217.50. Class is held at Pittsburgh Glass Center. Course Website: https://www.pittsburghglasscenter.or

62-464 Earring Clinic with Michael Mangiafico
Intermittent: 3 units
Explore the world of mandrel flameworked hanging style glass earrings through melting colorful soda lime glass that was manufactured in Italy. We will explore, make and incorporate traditional Venetian Zanferico that's fancy glass canes into delicate ornaments for the ears. Pursue the anatomy of a well-proportioned earring all the while playing with sparkly dichroic coated glass and learning how to put together a good loop for the pendant.

62-473 Books, Zines, and Multiples
Intermittent: 10 units
In this course, we will explore the possibilities for working with books, zines, and multiples as democratic prints, sculptural objects, site for time-based narratives, drawing, writing, documentation and so on. Students will be encouraged to experiment with a range of approaches to subject matter and form, with an eye on the relationship between original and copies. Prerequisite: 62-141

62-475 ACTIVATED ANAMORPHS: Performative Inhabitables and Interactive Prostheses
Fall and Spring: 6 units
This interdisciplinary studio course is centered around the relationship between wearable sculpture, prosthetic apparatus, DIY costume, movement, and identity-based performance. The course emphasizes hands-on experience, the development of visual skills, craftsmanship, conceptual development, and performance techniques. Class time will be spent designing and fabricating performative devices that alter, augment, mask, and transform the body and its inherent abilities. Various lectures, workshops, activities, presentations, and critiques will be included as an integral part of the learning process. Guest instructors from across the College of Fine Arts and outside of the institution will also provide lectures, and workshops that offer students multiple perspectives and techniques. Students will work in a variety of media, unveiling the meanings expressed through materials and investigating new ways to interact with our physical environment(s) through explorations in the adaptation, translation, enhancement, exaggeration, modification, and mutation of the human body. The course will involve student collaboration across disciplines, as well as rehearsals and public performances TBD.

62-478 IDEATE: digiTOOL
Fall and Spring: 6 units
This course serves as an introduction to the fundamental concepts, processes, and procedures to utilize digital and traditional equipment within the IDEATe facilities in Hunt Library. After completion, participating students should leave with a thorough understanding of the CNC workflow, 3D modeling, 3D printing, laser cutting, engraving, and basic finishing techniques. Students will learn how to operate in a safe, responsible, and efficient manner. This comprehension and experience proves useful for all creative disciplines, and participants are certified for future fabrication equipment access.

College of Fine Arts Interdisciplinary Courses
62-483 Growing Theatre Community Outreach  
Fall and Spring: 6 units  
Growing Theater engages students and mentors in the development of a collaborative theater experience. Through Mentor Role Modeling, Growing Theater uses drama as a medium to expose at risk population of fifth graders from a local school to a supportive learning environment that is shared, creative, confident, patient and respectful. Growing Theater Mentors will broaden students' personal and professional outlooks by guiding through them this theatrical process. The resulting play is performed in May at CMU. This course is open to all students, not just Drama majors.

62-661 Interaction and Expression using Pausch Bridge Lighting  
Fall and Spring: 3 units  
Working in cross-disciplinary teams, students will explore light as art, interactive design and programming using a Pharos lighting control system. Students will explore the use of light and interaction using the actual controls within the Randy Pausch Memorial Bridge. Student teams will develop final projects that will be exhibited on the actual Randy Pausch Memorial Bridge.

62-707 Introduction to Computational Geometry and Algorithmic Modeling  
Fall: 6 units  
This course will introduce concepts and strategies for the modeling and development of computational geometry for 3d printing purposes and introduce algorithmic thinking using the Rhinoceros McNeel platform and Grasshopper plugin. This course is intended for students with no or little 3-D modeling skills to advance their abilities in modeling, digital prototyping and visual communication.
Course Website: http://ideate.cmu.edu/about-ideate/departments/college-fine-arts/ideate-variational-geometry-i/

62-708 Theater Architecture I  
Spring: 9 units  
TBA

62-714 Galleries & Auction Houses: Economics of the Art Market  
6 units  
This class surveys the for-profit art gallery model. Topics include exploration of the business model and common practices of for-profit art galleries and the primary and secondary markets for art sales. Art Appraisals auctions and auction galleries artist procurement art collectors and investor cultivation as well as a profile of gallerists will be discussed in detail. Students will be required to work an art auction and attend the opening receptions for local exhibitions. There will be a non-required trip to the gallery districts of New York City to visit galleries and talk to gallery directors and staff. Corporate art collections will also be discussed as well as how to set prices artist commissions artist agreements consignment sales and inventory will also be topics covered by this course.

62-715 InterBreeding Architecture: Computational Techniques for Shaping the Environment  
Fall: 9 units  
InterBreeding Architecture (formally Ecologics) is a project based design-research seminar that investigates adaptive dynamic behaviors inspired by natural processes and biomimetics as a basis for design ideas. Students are introduced to computational design thinking and digital fabrication, using contemporary parametric modeling to incorporate environmental information into iterative design process and form making. The objective is to speculate about translation of performative contingencies into functional morphologies informed by data sets and simulation. We engage design processes in which systems' performance metrics underpin creative exploration of organization and form. The seminar results in the design and prototype of an individually proposed project. Students are immersed in digital parametric tools and contemporary digital fabrication processes, including 3D printing, CNC milling, vacuum forming and mold casting.

62-718 Theater Architecture II  
Spring  
TBA  
Prerequisite: 62-708

62-775 ACTIVATED ANAMORPHS: Performative Inhabitables and Interactive Prostheses  
Fall and Spring: 10 units  
This interdisciplinary studio course is centered around the relationship between wearable sculpture, prosthetic apparatus, DIY costume, movement, and identity-based performance. The course emphasizes hands-on experience, the development of visual skills, craftsmanship, conceptual development, and performance techniques. Class time will be spent designing and fabricating performative devices that alter, augment, mask, and transform the body and its inherent abilities. Various lectures, workshops, activities, presentations, and critiques will be included as an integral part of the learning process. Guest instructors from across the College of Fine Arts and outside of the institution will also provide lectures, and workshops that offer students multiple perspectives and techniques. Students will work in a variety of media, unveiling the meanings expressed through materials and investigating new ways to interact with our physical environment(s) through explorations in the adaptation, translation, enhancement, exaggeration, modification, and mutation of the human body. The course will involve student collaboration across disciplines, as well as rehearsals and public performances TBD. This section is open to graduate students only.
