The Marianna Brown Dietrich College of Humanities and Social Sciences

Richard Scheines, Bess Family Dean
Sharon Carver, Associate Dean for Educational Affairs
Joseph E. Devine, Associate Dean for Undergraduate Studies
Ana Maria Ulloa-Shields, Associate Dean for Student Success and Director, Dietrich College Academic Advisory Center

www.hss.cmu.edu (http://www.hss.cmu.edu)

The Dietrich College of Humanities and Social Sciences consists of undergraduate programs in Economics, English, History, Information Systems, Modern Languages, Philosophy, Psychology, Social and Decision Sciences, and Statistics & Data Science, as well as those offered by the Institute for Politics and Strategy. Dietrich College also offers a student-defined major, numerous interdepartmental majors, the intercollege Bachelor of Humanities and Arts program, and honors and pre-professional programs.

The college embodies one of the most varied groups of students, faculty, staff and alumni in the Carnegie Mellon University community, all united by a common goal: confronting and solving society’s most complex problems. We learn through experience, and we work without silos or walls. Our students and faculty work across traditional boundaries, collaborating with other disciplines to pursue the thrill of discovery. Dietrich College is a place to explore different points of view. And a place to do work that matters.

At Dietrich College, we approach education differently. We mash up the traditional liberal arts with analytical and computational approaches. Beginning in their first year, our undergraduates confront real-world problems like democracy and data, racism or environmental justice through Grand Challenge Seminars (https://www.cmu.edu/dietrich/students/undergraduate/programs/grand-challenge/) that are co-taught by faculty from disciplines across the college and university. In addition, students are required to take General Education (https://www.cmu.edu/dietrich/gened/) courses tied to specific learning goals. These courses help students to acquire and apply new knowledge and skills that are essential to their careers, citizenship and life. In addition to the required courses, students’ schedules also allow for broad exploration of our majors and minors (https://www.cmu.edu/dietrich/students/prospective/undergraduate/experiential-learning.html) – like internships, undergraduate research, study abroad and community service -- enhance our students’ undergraduate education.

Dietrich College students develop deep disciplinary knowledge — but that’s just the beginning. Students learn how to work on teams involving many disciplines. The knowledge landscape changes rapidly, and what students learn today may be outdated tomorrow. At Dietrich, students “learn how to learn,” discovering how to communicate, think and understand the world in ways that will benefit them for the rest of their lives.

Dietrich College alumni report that the skills they learned while in college helped them land opportunities in a highly competitive job market. Just as importantly, those skills helped graduates follow their passion and succeed in new endeavors outside a more traditional career path. Among the 90% of the Dietrich College class of 2020 (https://www.cmu.edu/dietrich/students/prospective/undergraduate/careers-and-outcomes.html) reporting, 93% found employment, entered graduate school or pursued other interests, like volunteering or military service.

Degree and Program Options

Dietrich College offers a wide range of majors and minors. In addition, there are a number of special programs which add breadth and enhance a student’s overall experience.

**Notes:**

1. Offered jointly by the Undergraduate Economics Program and the Department of Mathematical Sciences
2. Offered jointly by the Undergraduate Economics Program and the Institute for Politics and Strategy
3. Offered jointly by the Undergraduate Economics Program and the Department of Statistics and Data Science
4. Offered jointly by the Dietrich College of Humanities and Social Sciences and the Mellon College of Science
5. Offered jointly by the Departments of History and Philosophy
6. Offered jointly by the Department of Biological Sciences and the Center for the Neural Basis of Cognition
7. Offered jointly by the Departments of Psychology and Biological Sciences
8. Offered jointly by the Department of Statistics and Data Science and the Department of Computer Science
Additional Majors

Dietrich College students may pursue additional majors and/or minors in the college, as well as in other Carnegie Mellon colleges. An additional major refers to the completion of the requirements for a second major while also completing the requirements for the primary major and degree.

Most Dietrich College majors are also available as additional majors; one (Environmental and Sustainability Studies) is available only as an additional major. Students from outside Dietrich College can pursue additional majors offered by the college, and would be required to complete only those courses in the college’s general education program that are prerequisites to courses required for the Dietrich College major in question.

Minors

Minors are like majors in that they consist of coherent programs of study in a department, or across departments. Minors differ from majors in the number of the courses required and in the breadth and depth of the curriculum in the minor’s area(s) of study. Dietrich College students can also pursue minors offered and made available by other Carnegie Mellon colleges and departments.

There are two types of minors in Dietrich College: departmental minors, which are housed in a single Dietrich College academic department; and interdepartmental minors, which are sponsored by more than one academic department and administered through the faculty advisor’s academic department. The college’s minors are available to students from all colleges in the university.

Multiple Degrees

*Multiple degrees* is defined as more than one undergraduate degree granted by the university (whether simultaneous or sequential). One diploma is awarded for each degree; each degree has one primary major associated with it, and the possibility of an additional major and/or minor.

Dietrich College undergraduate students who wish to earn an additional undergraduate degree with a primary major also from Dietrich College must:

- Satisfy all requirements for the primary major to be linked to the additional degree.
- Complete at least 90 units beyond the total number of units required for the first degree. If the major associated with the additional degree requires less than 90 units, the student would earn additional elective units to reach the 90-unit minimum. If the major associated with the additional degree requires more than 90 units, the student would perfecce the 90-unit minimum in order to fulfill all of the requirements for the additional degree’s primary major.
- Comply with Carnegie Mellon’s Statute of Limitations Policy: All units required for an undergraduate degree, whether earned in residence, transferred from another institution or granted via advanced placement, must have been earned within eight (8) years prior to the date on which the degree is granted.

Non-Dietrich College undergraduate students at Carnegie Mellon who wish to earn an additional undergraduate degree with a Dietrich College primary major must complete all of the requirements listed above, plus any portion of the Dietrich College general education program not already fulfilled by prior undergraduate course work.

Bachelor of Arts & Bachelor of Science

Some Dietrich College majors lead to a Bachelor of Arts (B.A.) degree and others lead to a Bachelor of Science (B.S.) degree option. In some majors students may choose between a B.A. and a B.S. degree. B.A. degree programs usually require less course work in technical and/or quantitative disciplines, and more depth and breadth in various humanities and social science fields, and (in some cases) the arts. In contrast, B.S. degrees are offered in majors requiring more technical, quantitative or scientific competencies.

Dietrich College General Education Program

For students entering Fall 2021 and later*

www.hss.cmu.edu/gened

*For students entering prior to Fall 2021, click here (https://www.cmu.edu/dietrich/gened/) for the catalog description of the General Education Requirements.

The Dietrich College General Education curriculum (GenEd) provides robust training and knowledge that complements and strengthens the skills learned in a student’s primary major. The GenEd program contains several unique features including: 1) the anchoring of the curriculum on an explicit set of measurable learning outcomes; 2) a focus on creative multi and interdisciplinary approaches to complex problems; 3) the integration of instruction in core competencies like writing and data science across the entire four-year curriculum; 4) ensuring holistic advising is available to every Dietrich student; 5) the expansion of experiential learning opportunities through research and creative inquiry, paid internships opportunities, study abroad, and community engagement; and 6) the commitment to iterative program-level assessment that includes direct measures of student learning.

The GenEd is built on the foundation of 15 high level learning areas and nearly 50 specific student learning outcomes that guide the program. More information about the learning areas can be found on our GenEd website (www.cmu.edu/dietrich/gened/https://www.cmu.edu/dietrich/gened/).

Curriculum Requirements

The GenEd curriculum requirements total just above one third of a student’s overall degree requirements.
Course Categories

1. **Foundations (54 units total)**
There are six (6) foundations requirements, designed to teach both competencies that transcend disciplinary boundaries and the foundational knowledge and skills particularly important for Dietrich College students to acquire.

**Required in Year 1**
- Communication: 9 units
- Data Analysis: 9 units

The Communication requirement may be satisfied through one of the following options:

1. 76-101 (Interpretation and Argument) or 76-102 (Advanced First-Year Writing)
2. Choose 2 mini courses: 76-106 (Writing about Literature, Art, and Culture), 76-107 (Writing about Data), or 76-108 (Writing about Public Problems).

The Data Analysis requirement must be satisfied through the completion of 36-200 (Reasoning with Data). Advanced Standing (AP, IB, Cambridge, Transfer) credit will be accepted for this requirement.

**Required in Years 1-3**
- Computational Thinking: 9 units
- Contextual Thinking: 9 units
- Intercultural and Global Inquiry: 9 units
- Scientific Inquiry: 9 units

A list of courses for each of the above requirements can be found on the GenEd website (http://www.cmu.edu/dietrich/gened/).

2. **Disciplinary Perspectives (42 units total)**
There are five (5) disciplinary perspectives requirements, designed to provide a broad reflective understanding of disciplines both within and outside of the College.

**Required in Year 1**
- Humanities: 9 units
- Social Sciences: 9 units

**Required in Years 1-4**
- The Arts: 9 units
- Logic/Mathematical Reasoning: 9 units

**Required in Years 1-4 (6 units in one of the following three disciplines):**
- Design
- Business
- Engineering

A list of courses for each of the above requirements can be found on the GenEd website (http://www.cmu.edu/dietrich/gened/).

3. **Special Seminars and Topics (27 units total)**
The Special Seminars and Topics offer opportunities for students to engage in high-impact learning practices to ensure transformative and integrative learning.

**Required in Year 1**
- Grand Challenge Seminar: 9 units

**Required in Years 1-3**
- Equity and Justice: 9 units

**Required in Year 4**
- Senior Capstone*: 9 units

A list of courses for each of the above requirements can be found on the GenEd website (http://www.cmu.edu/dietrich/gened/).

College Services and Programs

The educational programs in Dietrich College are complemented by a number of services, special programs, centers, and computing facilities.

**Dietrich College Academic Advisory Center**
Ana Maria Ulloa-Shields, Associate Dean for Student Success and Director
Location: Baker Hall 160
www.cmu.edu/hsa/advisory-center

The Dietrich College of Humanities and Social Sciences Academic Advisory Center (AAC) is primarily responsible for advising and monitoring the progress of students prior to declaring a major. As the “home base” for undergraduates who are new to the college, the AAC provides an accessible, welcoming environment where students can seek information, advice, and counsel about selecting courses, the college’s general education program requirements, and the various majors and minors available. Just as important, advisors support students’ transition to life and study in the university. The advisor-student relationship is a reciprocal one. Advisors’ goals are to meet students where they are, to help them learn to successfully navigate the Carnegie Mellon environment, to become increasingly self-sufficient, and to make viable, informed and confident academic and personal decisions. This kind of relationship is vital to a student’s ability to progress, grow and thrive in a new and demanding educational environment. Additionally, the AAC serves as the office of student records for Dietrich College. Acting on behalf of the College Council, the Center Director oversees adherence to university and college academic policies and procedures.

**Dietrich College Senior Honors Program**
Joseph E. Devine, Director and Associate Dean for Undergraduate Studies
Location: Baker Hall 154F
www.cm.edu/dietrich/undergraduate/programs/shp

From its inception in 1982, the Dietrich College senior honors program (http://www.cmu.edu/dietrich/undergraduate/programs/shp/) has provided outstanding undergraduate students with the opportunity to work individually with faculty members throughout the college on original research and creative projects. The honors program is a senior-year program. Admission is based on achievement of a cumulative GPAQ of at least 3.50 in one’s major and 3.25 overall, endorsement of a thesis proposal by the faculty member who will serve as thesis advisor, and department head approval. Honors students enroll in an honors thesis course sequence for both semesters of the senior year (9 units per semester). Upon successful completion of the honors thesis, a student qualifies for graduation with Dietrich College Honors, and will have this designation as well as the thesis title noted on the final transcript.

Students have found the honors program to be a challenging and enriching experience in allowing for focused, individualized work on a sustained independent project. In the opportunity it provides to demonstrate one’s capacity for independent and original work, the senior honors program experience helps significantly in developing the ability to present one’s intellectual or creative self to others, including prospective employers or graduate and professional school programs.

Honors Research Fellowship Program (http://www.cmu.edu/dietrich/undergraduate/programs/shp/)
The Dietrich College Honors Research Fellowship Program is an optional component for students who have applied and been accepted into the college’s Senior Honors Program. Fellows spend the summer before their senior year undertaking early-stage research and development of their thesis topics. Financial support through a stipend and related funds for research-related expenses allows fellows to apply themselves full-time to their projects during these summer months. This in turn enables fellows to build a strong foundation and momentum for their honors thesis as the fall semester of the senior year gets underway, and ultimately leading to completion of the project by the end of the spring semester. Students apply for this fellowship program in the spring of the junior year, simultaneous with submission of an application and thesis project proposal for the Dietrich College Senior Honors Program.

**Humanities Scholars Program**
Timothy Haggerty, Director
Location: Posner Hall 252
The Marianna Brown Dietrich College of Humanities and Social Sciences

www.cmu.edu/dietrich/hsp (https://www.cmu.edu/dietrich/hsp/)

Since 2001, the Humanities Scholars Program (HSP) has provided an opportunity for students to use the tools of human inquiry to describe, analyze, and engage with the world. While the university is broadly known for its technological prowess and its interdisciplinary ethos, the humanities at Carnegie Mellon are also a vital part of the intellectual ecology of the university: humanities faculty have joint appointments in various every other college, school, or department on campus, and they collaborate across disciplines in the arts, engineering, and the sciences. At Carnegie Mellon, the Humanities Departments (English, Modern Languages and Cultures, History, and Philosophy) are integrated into the university’s broader academic environment to an unprecedented extent. Interdisciplinary work with technological, scientific, and artistic programs across campus are frequently the nexus by which new scholarly avenues and programs emerge in a changing intellectual landscape. For example, philosophers and computer scientists develop models of artificial intelligence, historians and engineers record emerging environmental patterns and solutions, linguists and cultural theorists help demarcate the patterns of recorded thought.

The Humanities Scholars Program invites a small cohort of students—usually no more than twenty—to work together to investigate the issues that confront contemporary society. The director helps select candidates in collaboration with the Academic Advisory Center and its Associate Dean during their first year at Carnegie Mellon, and they then start the program during their sophomore year with a series of two academic seminars that draw upon the expertise of humanities faculty and the broader intellectual depth of the campus. The Humanities Scholars Program sponsors campus-wide programs, often in collaboration with other programs, such as the Center for Divestigations in the Sciences and Society through the use of these techniques, it does so by laying out a structured program of training in advanced quantitative techniques that can be broadly applied across a range of social science disciplines and can be used to shape the direction and expand the impact of these techniques. In this paper, we will focus on the ways in which researchers can use the resources of the program to further their own research, how can use these techniques to create a broader and deeper scientific understanding of human behavior that serves as the foundation upon which both entrepreneurs and policymakers can build.

The QSSS program is designed to help outstanding undergraduates impact society through the use of these techniques. It does so by laying out a structured program of training in advanced quantitative techniques that can be broadly applied across a range of social science disciplines and topics. Students combine this methodological training with more traditional coursework in a Dietrich College major of their choice. The program equips students to undertake sophisticated analysis of their own, and features a new, innovative degree program. The program equips students to undertake sophisticated analysis of their own, and features an integrative senior thesis project that applies their methodological training to a research question of their own choosing. Students may apply for entry to the QSSS program during the spring of the freshman year. Applications consist of a student transcript, and statement of interest.

The QSSS program is not a freestanding major or a minor, per se. It is a program designed to be taken in conjunction with a social sciences or humanities major in Dietrich College. In addition to two seminars completed in their sophomore year, students complete a two-semester senior thesis paper working in collaboration with a faculty member of their choice. The program recruits students with a range of interests across the social sciences to create a cohesive interdisciplinary learning community. Majors that could fit well with this program include (but are not limited to) economics, behavioral economics, policy and organizations, decision science, policy and management, international relations and politics, statistics, statistics, and machine learning.

Student-Defined Program

Joseph E. Devine, Director and Associate Dean for Undergraduate Studies

Location: Baker Hall 154

www.cmu.edu/dietrich/undergraduate/student-defined-majors.html (http://www.cmu.edu/dietrich/undergraduate/student-defined-majors.html)

For students whose educational goals cannot be as adequately served by the curricula of existing programs, the college provides the opportunity to self-define a major or minor. The procedure for establishing such a major centers on a written proposal, submitted to the college dean’s office. This proposal consists of two parts:

Program description and rationale: A description of the components of the proposed program of study; a presentation of the objectives of the program of study, why it represents a coherent and (given available faculty, courses, and other resources) viable course of study, and the reason(s) why these objectives cannot be accomplished within one or more of the college’s existing programs.

The curriculum: Presentation of a complete outline of all courses that will comprise the requirements for the major or minor, categorized according to that component of the major program to which each belongs (e.g., mathematics prerequisites; research methods; theoretical perspectives; etc.), and second, a semester-by-semester outline that indicates which courses must be taken (or, for any already taken, when taken). The minimum requirement for graduation is, as with all majors in the college, 360 units of credit.

Proposals and curricula are evaluated for clarity of focus, coherence and depth in related areas, and viability within the context of the college and university offerings. Proposals should generally be developed no later than the sophomore year, and approved majors begin their program generally no later than the junior year.

As with all other Dietrich College majors, Dietrich College student-defined primary majors must fulfill all of the college’s general education requirements.

Study Abroad FUNDING

Funding support for study and travel abroad is available through several sources, many administered by the university, and many others available externally. The Office of International Education is the first place to look for information about funding opportunities for study or travel abroad. Proposals and curricula are evaluated for clarity of focus, coherence and depth in related areas, and viability within the context of the college and university offerings. Proposals should generally be developed no later than the sophomore year, and approved majors begin their program generally no later than the junior year.

As with all other Dietrich College majors, Dietrich College student-defined primary majors must fulfill all of the college’s general education requirements.

As with all other Dietrich College majors, Dietrich College student-defined primary majors must fulfill all of the college’s general education requirements.
Undergraduates with primary majors in Dietrich College, as well as BHA students, are eligible and encouraged to apply. Current sophomores and juniors receive preference. NOTE: Graduating seniors are not eligible.

Students are expected to find their own internships. There are many resources available to help in finding internships, including the Career and Professional Development Center’s internship database. Preference for grants is given to students who find positions in the public sector or non-profit agencies.

For more information, including application time line and instructions, see: www.cmu.edu/dietrich/students/undergraduate/resources/internship-opportunity-grants.html (https://www.cmu.edu/dietrich/students/undergraduate/resources/internship-opportunity-grants.html)

Dietrich College Pittsburgh Summer Internship Program

www.cmu.edu/dietrich/students/undergraduate/programs/summer-internship-program.html (https://www.cmu.edu/dietrich/students/undergraduate/programs/summer-internship-program.html)

The Dietrich College Pittsburgh Summer Internship Program is designed for undergraduates who have not yet had a meaningful internship and are seeking to engage and connect with non-profit organizations and start-ups in Pittsburgh.

Pittsburgh-area companies and organizations host Dietrich College students for a 10-12 week summer internship, working around 20 hours per week. Students that secure an internship through the program receive a $3,000 stipend provided by the college.

Because of the program’s strong local focus, all interns are required to work in the City of Pittsburgh during the summer, not remotely, so as to ensure that they get the most out of this experience. Participants are also required to attend professional development workshops hosted by the program and focused on a variety of topics including communication, professional etiquette, giving/receiving feedback, and networking.

Carnegie Mellon University
Washington Semester Program

Mark S. Kamlet, Interim Director, University Professor of Economics and Public Policy, and Provost Emeritus
kamlet@cmu.edu, Posner Hall 385A

Emily Hall, IPS Deputy Director
elahalf@andrew.cmu.edu; 412-268-7082, Posner Hall 391

Meghan Mattern, CMU/WSP Program Manager
mmattern@andrew.cmu.edu; 202-609-8316, 100 Maryland Ave NE, Suite 510, Washington, DC 20002

www.cmu.edu/ips/cmuwsp (http://www.cmu.edu/ips/cmuwsp/)

From embassy headquarters to nongovernmental organizations, think tanks to advocacy organizations, and consulting firms to media outlets, Washington, DC, is a focal point for many international and public policy activities.

Undergraduates from any course of study who would value firsthand policy experience are invited to apply to the Carnegie Mellon University Washington Semester Program (CMU/WSP), sponsored by the university’s Institute for Politics and Strategy. In this semester-long program, students live, work, and study in Washington, DC, coming into direct contact with political, business, and community leaders and learning about the most pressing policy issues of the day.

Students earn 48 units for the Carnegie Mellon University Washington Semester Program, interning about twenty-four hours per week in any sector or field of interest within Washington, DC, while taking classes taught by Carnegie Mellon faculty. The Institute for Politics and Strategy sponsors events and policy-oriented opportunities in Washington for students participating in the program to further enrich their experience and enhance their understanding of how Washington functions as a hub of international and public policy decision making.

Students should contact the IPS deputy director for more information or to discuss how the CMU/WSP may fit into their curriculum. Students who participate in the CMU/WSP may qualify for a minor in Politics and Public Policy (https://www.cmu.edu/ips/undergraduate%20degrees/minors/minor-in-politics-and-public-policy.html).

Academic Standards, Regulations and Protocols

GRADUATION REQUIREMENTS

Eligibility for graduation in Dietrich College requires that a student:

1. complete all Dietrich College general education requirements,
2. complete all course requirements in a Dietrich College primary major,
3. achieve a cumulative quality point average of at least 2.00 for all courses taken (or, alternatively, for all courses taken after the 1st year),
4. earn at least 360 units with a minimum of 180 units taken at Carnegie Mellon University,
5. be recommended (certified) for graduation by the faculty of the student’s primary major department,
6. meet all financial obligations to the university, and
7. qualify for graduation within eight years of matriculation as a degree candidate.

The college reserves the right to modify these academic standards, regulations, and protocols.

Graduation with University Honors

Dietrich College students who achieve an overall QPA of at least 3.50 will be recommended for graduation with University Honors.

Graduation with College Honors

Students who successfully complete a senior honors thesis under the auspices of the Dietrich College Senior Honors Program qualify for graduation with Dietrich College Honors.

DOUBLE-COUNTING COURSES

Double-counting refers to instances when a course taken to fulfill one requirement counts simultaneously toward a requirement in another major or minor program. While the college encourages study in complementary areas where majors and minors frequently share requirements in common, it also wants to keep clear the meaning and integrity of the labels “major” and “minor.” To preserve the integrity of these definitions, double-counting is permitted in Dietrich College on a very limited basis, and only in those instances when the course(s) in question represent only a small portion of the second program.
DIETRICH COLLEGE CREDIT POLICY FOR NON-CARNEGIE MELLON COURSES

The following policies govern the practice of Dietrich College undergraduates taking courses elsewhere and requesting that credits for these courses transfer to their Carnegie Mellon University academic record. Courses taken elsewhere will be considered for transfer credit if the institution offering them is fully accredited, and if the courses in question are judged to be acceptable for the purposes proposed by the student.

Approval

Dietrich College undergraduates who wish to take courses at another institution and request that credits for these courses transfer to their Carnegie Mellon University record should familiarize themselves with Dietrich's transfer credit policies (http://www.cmu.edu/dietrich/advisory-center/transferring/cmu-course-credit.html). Students must receive approval before taking any courses at another institution in order to guarantee that they will receive transfer credit upon successful completion of the course(s).

Limits

Undergraduate students may take courses that add up to a maximum of 180 units and transfer these back for credit toward the Carnegie Mellon degree.

Exceptions

These limits do not apply to courses and credits taken through cross-registration via the Pittsburgh Consortium for Higher Education (PCHS), and approved study abroad or exchange programs. Exceptions to these restrictions may be made only by way of written petition to the Dietrich College Office of Undergraduate Studies.

In general, approved courses taken elsewhere will transfer as elective credit, unless otherwise approved by the college or relevant academic department.

Grades

Courses taken elsewhere must be taken for a regular letter grade (not pass/no credit or pass/fail) in order to be granted transfer credit. As a matter of college policy, Dietrich College students must earn a final grade of at least “C” in order for the credit to transfer. A “C-” grade is not transferable when its equivalency is below a 2.00 on a 4.00 scale, or 70%. In cases when courses proposed for transfer credit are to apply to requirements in a Dietrich major or minor program, the program's department may set a higher minimum final grade in order for credit to transfer. Only units, not grades, transfer for courses taken elsewhere, and thus do not affect a student's Carnegie Mellon QPA. Courses offered elsewhere only on a “pass/fail” or “pass/no credit” basis are not eligible for CMU transfer credit.

Students should consult their academic advisor before taking courses at another institution for which they want to receive transfer credit.

External Transfer Students

For students entering Carnegie Mellon and Dietrich College as external transfers, the same 180-unit limit on transfer credit applies. A candidate for the bachelor's degree must complete a minimum of four semesters of full-time study, or the equivalent of part-time study, comprising at least 180 units of coursework at Carnegie Mellon. If a degree has already been obtained at another institution, courses that count toward that degree may not be used again as transfer credit toward a Carnegie Mellon University undergraduate degree.

Internal Transfer Students

This policy applies retroactively to students who enter Dietrich College through internal transfer. Courses previously approved for transfer credit may be re-evaluated for consistency with relevant Dietrich College or program policies and standards.

Students on Academic Suspension

Subject to the college's policy limiting transfer course credit, students on academic suspension from Dietrich College will be permitted to receive transfer course credit for no more than three non-CMU courses per semester while on suspension. Approval to take these courses for transfer credit is to be obtained in advance.

While on academic suspension, students are considered to be on a mandatory “leave of absence” and are governed by College and University policies concerning leaves of absence (https://www.cmu.edu/policies/student-and-student-life/student-leave.html).

COURSE OVERLOADS

Overloading is defined as taking more than the equivalent of five full-semester courses in one semester; for Dietrich College students this usually means registering for more than 50 units in one semester.

Eligibility to overload is defined as having a QPA of at least 3.25 in the last completed semester, based on a course load of at least 45 factorable units, and a current cumulative QPA of at least 3.00. Students new to the college and university (i.e., first-year students and new external transfer students) may not overload during their first Carnegie Mellon semester.

Eligibility to overload based on QPA does not automatically allow the student to register for an overload. Rather, students must complete an overload petition, and meet with their primary academic advisor to discuss the proposed overload. If approved, the academic advisor will increase the student's unit maximum for the relevant semester.

The first opportunity to register for a course overload is after registration week for the proposed overload semester. Registration week for the spring semester is usually the third week in November; for the fall semester, it is usually the third week in April. Consult the official university academic calendar for the exact dates.

If as a result of final grades for the current semester a student approved to overload for the next semester falls below the QPA overload eligibility criteria, the academic advisor may withdraw the overload permission. Students thus affected are responsible for resolving this in consultation with their academic advisor.

PHYSICAL EDUCATION AND STUCO* COURSES

A maximum of nine units of credit for any combination of Physical Education (69-xxx) and StuCo (98-xxx) courses may be counted as credit toward graduation requirements. Physical Education and StuCo courses are not included when calculating a student's QPA or when calculating units to determine eligibility to carry a course overload.

*StuCo (http://www.cmu.edu/stuco/) refers to “student-led courses” — i.e., courses designed by students, and approved to be offered for academic credit.

INTERNSHIPS-FOR-CREDIT

An internship-for-credit is a supervised, professional work experience with clear links to a student's academic program, performed primarily or totally outside of a regular course structure, and for which a student earns academic credit. Students doing an internship for academic credit must be registered through the academic department of the faculty member supervising the internship, and must register for the internship course during the term (including the summer) when the internship work is being performed. There is no additional tuition charge for credit-bearing internships that are taken during the academic year as part of a normal, full-time course load. Students registered for internships during the summer will be billed for tuition at the per-unit rate set by the university.

To receive academic credit, the internship:

* must conform to the criteria for internships-for-credit (https://www.naceweb.org/about-us/advocacy/position-statements/position-statement-us-internships)set by the National Association of Colleges and Employers and the U.S. Department of Labor;
* requires the involvement of a Carnegie Mellon faculty sponsor and an on-site supervisor in the design, oversight and evaluation of the internship;
* must include regular or periodic meetings between the student, the faculty sponsor, and/or the internship site supervisor to monitor progress and offer feedback on student performance;
* requires an end-product for submission to the faculty sponsor. This usually takes the form of a paper, but may also include a presentation, or some other approved form;
* may be taken for a regular letter grade or pass/no credit as per the policy of the department through which the internship course is taken. With department approval, the internship may be counted toward program requirements;
* can vary from 3-18 units in any one semester, and is limited only by the college rule of a maximum of 27 units of internship credit that can be applied to graduation requirements.

Additional policies and practices regarding internships-for-credit vary among the college's academic departments. Departments are not obligated to allow internship credit for its majors, and are free to determine whether an
A Dietrich College student may not earn more than 18 units of internship credit during a single semester or count more than 27 units of internship credit toward fulfillment of graduation requirements.

In instances when the internship sponsor requires that a student receive academic credit from the home institution, the student should contact the Dietrich College Associate Dean for Undergraduate Studies for information and advice about available options.

DIETRICH COLLEGE DEAN’S HONOR LIST

Each semester the college recognizes those students who have attained outstanding scholarship with point averages by naming them to the Dietrich College dean’s honor list.

Students who complete at least 45 factorable units and attain a semester GPA from 3.50 through 3.74 are named to the Dean’s List with Honors; if the semester GPA is 3.75 or higher, students are named to the Dean’s List with High Honors.

Students who complete at least 36 or up to 44 factorable units and attain a semester GPA of 3.75 or higher are named to the Dean’s List, with Honors.

In addition, it is generally the case that students are not eligible for the dean’s list who receive one or more “Incomplete” grades at the time when final semester grades are recorded.

Transferring into Dietrich College

Undergraduate students in other Carnegie Mellon colleges who wish to transfer (http://www.cmu.edu/hs/advisory-center/transferring-transfer-in.html) to Dietrich College apply through the college’s Academic Advisory Center (https://www.cmu.edu/dietrich/academic-advising-center), located in Baker Hall 160. If approved, the transfer is into the college first and then into a primary major.

Decisions regarding transfer requests will be based on evidence of adequate prior academic performance and on the applicant’s prospects for success in the college and intended major.

The earliest point when undergraduates are considered for transfer into Dietrich College is after mid-semester grades are available in the second semester of the first year.

Students interested in transferring to Dietrich College should begin the process well before the course registration period for the upcoming semester.

Prior to submitting a transfer application, students are encouraged to meet with representatives in the department where they are hoping to pursue a primary major.

Course Failures and Course Repetitions

Students who fail a required course must repeat and pass it (or take and successfully complete another approved course that fulfills the requirement). If a failed course is a prerequisite to more advanced coursework, the failed course must in general be repeated before moving on to the higher level course. Exception: Dietrich College students who do not successfully complete their first-year seminar will be registered for another first-year seminar where space is available.

Failed courses that are repeated and passed, or courses that are passed but repeated in order to obtain a higher grade, remain on the student’s record and are included in calculating the student’s GPA. Students who repeat a course that they have already passed will not be able to apply the second set of units for the course toward graduation requirements.

Academic Actions

In order to maintain good academic standing, Dietrich College students must attain at least minimum quality point averages for each semester (as well as cumulatively), and also make and maintain adequate progress toward completing their degree requirements. Minimum quality point averages for good academic standing are 1.75 in the first year and 2.00 thereafter. “Adequate progress toward graduation” generally means that students are successfully completing 45-50 units per semester so that at the end of eight semesters they will have accumulated the minimum of 360 units required for graduation, have a cumulative GPA of at least 2.00, and completed all college General Education and primary major course requirements.

When a student fails to meet minimum performance criteria, it normally results in an “academic action.” Depending on the circumstances, one of the following actions is taken: academic warning, academic probation, continued probation, suspension, or drop. These academic actions are recommended by the college’s departments based on the guidelines described below. However, the sequence of the academic actions is not automatic in all cases. Decisions may be based on unique individual student performance and circumstances, and are not determined purely on the basis of grades and quality point averages.

Academic Warning

A student may receive an academic warning when they meet any of the following criteria: not passing two or more P/NP courses; repeatedly failing required courses, or repeatedly failing to attain minimum-level passing grades in prerequisite courses; earning a GPA between a 1.75 and 1.99 in the first year; failing to complete the first-year general education requirements by the end of the student’s fourth semester; falling off pace to graduate in 10 semesters; failing to make sufficient progress through their declared primary major; having two consecutive semesters failing to complete a minimum of 36 units per semester; receiving multiple Incompetes in a semester; receiving Incomplete grades over two consecutive semesters; or taking leaves of absence in each of two consecutive semesters.

The term of academic warning is one semester, and serves to alert the student that he or she is falling to make good academic progress toward degree completion despite meeting the college’s minimum GPA threshold to maintain good standing. A student’s academic warning is removed when the issue(s) that led to the warning have been resolved and no new issues around satisfactory academic progress have surfaced. A student can continue on an academic warning or move to academic probation if warranted by additional issues.

Academic Probation

A student is placed on academic probation when performance either for the semester or cumulatively fails to meet the minimum standard. The term of academic probation is one semester, and signifies to the student the college’s insistence that academic performance return to at least the minimum acceptable level, and concern that a student has failed to do so. A student is removed from academic probation and returned to good academic standing when both the semester and cumulative quality point averages meet at least the stated minimum, and when adequate progress toward completing degree requirements is being made. A student who has had one semester on probation and is not yet meeting minimum requirements but is making significant progress in this regard may be continued on academic probation.

Academic Suspension

Academic suspension is the usual action taken when a student fails to meet the minimum semester or cumulative requirements for two consecutive semesters. In general, a first-year student will be suspended if the semester and overall QPAs are below 1.75; for sophomores, juniors, and seniors, if these are below 2.00. Failure to maintain adequate progress toward graduation may also be a contributing factor in such decisions.

The minimum period of academic suspension is normally two semesters (not including summer), during which a student on academic suspension is expected to reflect on the circumstances leading up to the suspension, identify the issues that prevented the student from achieving academic success, and take actions that address these issues and demonstrate sufficient readiness to return to the university and successfully resume their studies. These actions could include a work or internship experience, a limited amount of pre-approved academic course work at another college or university, and — if relevant — appropriate medical care.

Midway through the semester before a suspended student is eligible to return to the university, the student will be contacted via email by the Academic Advisory Center Director with detailed instructions about the process for requesting approval to return and re-enroll.

Once cleared to return from academic suspension, the Enrollment Services office will be notified and the student will be eligible to enroll. While on academic suspension, students are considered to be on a mandatory “leave of absence,” and are governed by college and university policies concerning such leaves of absence. See subsequent discussions of “Leave of Absence” and Withdrawal from the College.” Students returning from academic suspension do so on final academic probation.

Academic Drop

The most severe academic action occurs when a student is dropped for academic reasons from the college and the university, and is not permitted to re-enroll. This normally results when a student, already on final academic probation, continues to perform at levels below the minimum set by the college for good academic standing, and shows no indication of being able to reach an acceptable level of performance or maintain steady progress.
toward completing graduation requirements. It is also an option when, in unusual cases, a student has performed poorly, and has been unresponsive to outreach efforts by college and/or university offices seeking to offer help and support.
