Heinz College of Information Systems and Public Policy

Ramayya Krishnan, Dean
Location: 1003 Hamburg Hall
www.heinz.cmu.edu (http://www.heinz.cmu.edu)

The next generation of leaders must deeply understand this critical point of intersection: People, policy, and technology. The connections between these three define our time, and will continue to shape the future of humankind.

At Heinz College, we’ve understood this since our founding, and we provide students with a foundation of data analytics, technology, evidence-based management, and rich experiential learning in contexts that are crucial to society, such as public policy, health care, information systems, cybersecurity, the arts, and entertainment.

Our research programs are best described as data-intensive social science. Our economists, statisticians, operations researchers, computer scientists, and management experts sit side by side, collaborating constantly and not sitting in traditional departmental silos. For this reason, they are able to approach complex societal problems in an altogether different way and impart this interdisciplinary mindset to our students.

The unique co-location of our two schools, the School of Public Policy and Management (https://www.heinz.cmu.edu/about/public-policy-management/) and the School of Information Systems and Management (https://www.heinz.cmu.edu/about/information-systems-management/), offers opportunities for collaboration that simply cannot be duplicated elsewhere. We also offer two groundbreaking Joint Degree Programs with the CMU College of Fine Arts (https://www.heinz.cmu.edu/about/fine-arts/).

Graduates of Heinz College are highly sought by employers across sectors for their interdisciplinary expertise and ability to use relevant data to solve complex problems. Our alumni work for government agencies at the federal, state, and local levels. They work in roles that directly impact national security. They work for tech giants, big consulting firms, major media outlets, cultural institutions, top hospitals and health systems, non-profits, and community organizations of all sizes. They work for startups—or they found their own.

Learn more about Heinz College graduate degree programs (https://www.heinz.cmu.edu/programs/).

Public Interest Technology
Public Interest Technology (PIT) is an emerging field unto itself, but Carnegie Mellon University has been a leader in this space for over 50 years, promoting the use of technology to advance the public interest. Continued excellence in this space is a priority for Heinz College.

Learn more about PIT at Heinz College (https://www.heinz.cmu.edu/about/public-interest-technology/).

Minor in Decision Analytics and Systems (DAS)

Students in any undergraduate major at Carnegie Mellon University can elect the Minor in Decision Analytics and Systems (DAS), building along the way a robust interdisciplinary toolkit that draws on computer science, economics, statistics, operations research, machine learning, and information systems. You will also learn how to apply this toolkit to consequential societal problems!

Heinz College offers the undergraduate Minor in Decision Analytics and Systems (DAS), providing you with the opportunity to add systems thinking and evidence-based problem solving to any field of study.

Data is a means to an end—creating value for people and society. But before data can create value, there comes a critical decision point. DAS prepares you to be the one who makes that decision, navigating the process from end to end: from identifying a current decision point and the problem it could solve, to determining the right decision and its potential value, and finally communicating that value and putting the decision into action.

Using Heinz College’s deep expertise in analytics, public policy and information systems as a launchpad, the DAS minor features game-changing experiential courses that ground DAS strategies in real world application, so you can see the social impacts of this work firsthand.

The DAS minor will launch Fall 2022. For more information, contact Professor Raja Sooriamurthi at raja@cmu.edu.

DAS MINOR CURRICULUM AND COURSEWORK

DAS Core Courses:

- Introduction to DAS (94-416 Introduction to Decision Analytics and Systems)
- Simulation for DAS (94-417)
- Optimization for DAS (94-433)
- Applied Econometrics for DAS (94-431)
- Critical Analysis of Policy Research (90-422)
- Machine Learning for Public Policy Lab (94-489 Machine Learning for Public Policy Lab)

Expected Pre-requisites:

- Calculus (21-111 Calculus I, 21-112 Calculus II, OR 21-256 Multivariate Analysis)
- Matrix Algebra (21-240 Matrix Algebra with Applications)
- Probability and Statistics (36-225 Introduction to Probability Theory AND 36-226 Introduction to Statistical Inference)
- Principles of Microeconomics (73-102 Principles of Microeconomics)

SAMPLE SCHEDULE: DAS
Below is one possible schedule for the DAS minor. Actual schedules may vary based on course availability and other factors.

Year Two - Fall Semester

- Introduction to DAS
- Optimization for DAS

Year Two - Spring Semester

- Simulation for DAS
- Applied Econometrics for DAS

Year Three - Fall Semester

- Critical Analysis of Policy Research

Year Three - Spring Semester

- Machine Learning for Public Policy Lab

Minor in Health Care Policy and Management

Sponsored by:
Heinz College of Information Systems and Public Policy
Dietrich College of Humanities and Social Sciences
Mellon College of Science

Faculty Advisors:
Jason D’Antonio, Mellon College of Science
James F. Jordan, H. John Heinz III College

The face of health care is changing. The practice of medicine is being fundamentally altered by the forces of change in public policy, health care organizations and in the industry as a whole. The role of individual professionals in this industry is changing as rapidly as the industry itself. Traditional career paths have disappeared overnight to be replaced by new opportunities that require new skills. New organizations are placing new demands on their professional and medical staffs. The criteria of efficiency and financial stability are entering the domains of diagnosis and treatment.

This minor is designed to provide students considering a career in the health professions with an understanding of how these changes are likely to affect their careers. Students will become familiar with the critical policy and
Students with the drive to develop as leaders and enter the job market more quickly can earn their CMU undergraduate degree and a professional master’s degree from Heinz College together in five years instead of the typical six.

An Accelerated Master’s Program (AMP) isn’t just a savings of time. It’s also a considerable savings in cost, and adds a tremendous level of experience and expertise in a specific industry.

In the Heinz College AMP program, students complete 3 years in a CMU undergraduate program (any major), followed by 1 year of integrated study, followed by 1 full year at Heinz College.

The following Heinz College master's degree programs offer accelerated options for CMU undergraduates:

- Master of Arts Management (MAM)
- Master of Entertainment Industry (MEIM)*
- Master of Information Systems Management (MISM)
- Master of Science in Health Care Policy and Management (MSPHPM)
- Master of Science in Information Security Policy and Management (MSISPM)
- Master of Information Security Policy and Management (MSISPM)*
- Master of Science in Public Policy and Management (MSPPM)*

Students must apply and be admitted to Heinz College. Learn more about Heinz College admissions requirements (https://cms.heinz.cmu.edu/entity/open.act?type=page&id=9aeb56a680021b6514aaf1b14fba800f&confId=a9cd07a80021b6514aaf1b14d072aab).

For more information on Accelerated Master’s Programs, please contact the Heinz College Office of Admissions at hznadmin@andrew.cmu.edu or by phone 412-268-2164.

*Note on AMP planning for MEIM and MSPPM - Washington, D.C.: Due to the rigorous format and unique academic demands of the MEIM and MSPPM – Washington D.C. programs—with their second years at CMU’s Los Angeles and D.C. campuses, respectively—interested students should begin the AMP planning process as early as possible in their undergraduate career. Students must ensure that they have satisfied all requirements for their undergraduate degree, as well as their first-year master’s requirements, by the end of the fourth AMP year.

Ph.D. Program

Distinguished by the interdisciplinary model of Heinz College and Carnegie Mellon University, our Ph.D. programs prepare graduates to lead change in their chosen fields through meaningful collaborations and hands-on work with our renowned and extremely accessible faculty.

Heinz College features the unique co-location of two schools: The School of Information Systems and Management and The School of Public Policy and Management; however, below that larger structure, we are a college without departments and their characteristic silos. Our faculty, students, and research centers thrive by working together to solve problems across subjects, disciplines, and business verticals.

In the Heinz College Ph.D. program, you will conduct innovative research to address increasingly complex challenges facing society, whether those challenges are technical, organizational, political, economic, social, or—as is often the case—some combination thereof.

Faculty and Research Centers

FACULTY

Heinz College has an international reputation for the quality of its research. Our interdisciplinary environment creates exciting opportunities for collaboration and produces a breadth of research work not typically found in schools of our size.

Our faculty and research centers consistently receive funding support from government agencies, foundations and corporate partners, like the National
Science Foundation; the Heinz Endowments; the Mellon Foundation; the U.S. Departments of Defense, Commerce, Health and Human Services, and Housing and Urban Development; the Sloan Foundation; and the National Institute of Justice.

Visit our Faculty pages (https://www.heinz.cmu.edu/faculty-research/) to learn more about individual faculty members, accomplishments, and current research.

RESEARCH CENTERS
We host, or are closely associated with, these CMU research centers:

- Arts Management and Technology Laboratory (AMTLab) (http://amlab.cmu.edu/)
- Block Center for Technology and Society (https://www.cmu.edu/block-center/)
- Center for Behavioral Decision Research (CBDR) (http://cbdr.cmu.edu/)
- Center for Economic Development (CED) (https://www.heinz.cmu.edu/ced/)
- CyLab (http://www.cylab.cmu.edu/)
- Event and Pattern Detection Lab (EPD Lab) (http://epdlab.heinz.cmu.edu/)
- Lab (http://lab.heinz.cmu.edu/)
- Initiative for Digital Entertainment Analytics (IDEA) (http://idea.heinz.cmu.edu/)
- Living Analytics Research Centre (LARC) (https://larc.smu.edu.sg/)
- Metro21: Smart Cities Institute (http://www.ices.cmu.edu/metro21/)
- Privacy Economics Experiments (PEEX) Lab (https://peex.heinz.cmu.edu/)
- Program for Research and Outreach on Gender Equity in Society (PROGRESS) (https://www.cmu.edu/dietrich/progress-equity-leadership/)
- Risk and Regulatory Services Innovation Center (sponsored by PwC) (https://www.cmu.edu/risk-reg-center/)
- Traffic21 (https://traffic21.heinz.cmu.edu/)

Diversity and Inclusion
The Heinz College of Information Systems and Public Policy represents over 50 nations and over 40 U.S. states, which increases our ability to foster a community with greater variation in perspectives and approaches to our work.

By design, Heinz College is an empathetic and open environment that inspires continuous learning, conversation, and intelligent action that will impact society for the better.

Diversity, inclusion, and equity are not radical concepts. Rather, the ongoing pursuit of these ideals is fundamental to the energetic exchange of ideas; the success of our students, faculty, and staff; and the unlocking of innovations that will improve the human condition.

Heinz College proudly champions the unique experiences of all members of our campus community. It is a priority for Heinz College to attract, maintain, and nurture a student body of diverse viewpoints, backgrounds, and talents. We are also committed to improving access to our graduate programs, in particular for underrepresented populations. We support these efforts through a variety of initiatives, programming, and partnerships in addition to Carnegie Mellon University’s campus-wide efforts.

Learn more about Diversity & Inclusion at Heinz College (https://www.heinz.cmu.edu/about/diversity/).

Faculty
ALESSANDRO ACQUISTI, Assistant Professor of Information Systems and Public Policy - Ph.D., UC Berkeley; Carnegie Mellon, 2003-

LEMAN AKOGLU, Dean’s Associate Professor of Information Systems – PhD, Computer Science, Carnegie Mellon University; Carnegie Mellon, 2012-

LINDA BABCOCK, James M. Walton Professor of Economics – Ph.D., University of Wisconsin at Madison; Carnegie Mellon, 1988-

EDWARD BARR, Associate Teaching Professor – M.S., Indiana University of Pennsylvania; Carnegie Mellon, 2000-

MARTIN BARRETT, Associate Teaching Professor – Ph.D. in Computer Science, University of Wisconsin-Madison; Carnegie Mellon, 1996-

DAREEN BASMA, Assistant Dean of Diversity, Inclusion, Climate & Equity (DICE) – Bachelor’s degree in Psychology & Religious Studies, Master’s degree in Mental Health Counseling, Ph.D. in Counselor Education & Supervision, University of Tennessee; Carnegie Mellon, 2000-

ALFRED BLUMSTEIN, J. Erik Jonsson University Professor of Urban Systems and Operations Research; Director, National Consortium on Violence Research – Ph.D., Cornell University; Carnegie Mellon, 1969-

SILVIA BORZUTSKY, Associate Teaching Professor – Ph.D., University of Pittsburgh; Carnegie Mellon, 2001-

LEE BRANSTETTER, Associate Professor of Economics – Ph.D., Harvard University; Carnegie Mellon, 2006-

JONATHON CAULKINS, Professor of Operations Research and Public Policy; Faculty Chair, Master of Public Policy and Management Program – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1990-

GEORGE CHEN, Assistant Professor of Information Systems – Ph.D. in Electrical Engineering and Computer Science, MIT; Carnegie Mellon, 2015-

DAVID CHOI, Assistant Professor of Statistics and Information Systems – Ph.D., Electrical Engineering, Stanford University; Carnegie Mellon, 2004-

ALEXANDRA CHOULDECHOVA, Assistant Professor of Statistics and Public Policy – Ph.D. in Statistics, Stanford University; Carnegie Mellon, 2014-

JACK CHOW, Distinguished Service Professor – M.D., University of California at San Francisco School of Medicine; Carnegie Mellon, 2011-

KAREN CLAY, Assistant Professor of Economics and Public Policy – Ph.D., Stanford University; Carnegie Mellon, 1997-

BRETT ASHLEY CRAWFORD, Associate Teaching Professor of Arts Management – Ph.D. in Theatre History and Criticism, University of Maryland; Carnegie Mellon, 2015-

GEORGE T. DUNCAN, Professor of Statistics, Emeritus – Ph.D., University of Minnesota; Carnegie Mellon, 2011-

NEELAM DWIVEDI, Assistant Teaching Professor – PhD in Information Sciences and Technology, Penn State University; Carnegie Mellon, 2015-

PEDRO FERREIRA, Associate Professor of Information Systems – Ph.D., Engineering and Public Policy Specialization in Telecom Policy, Carnegie Mellon University; Carnegie Mellon, 2004-

REBEKAH FITZSIMMONS, Assistant Teaching Professor of Professional Communication – PhD in English, University of Florida; Carnegie Mellon, 2015-

MARTIN GAYNOR, E.J. Barone Professor of Economics and Health Policy; Faculty Chair, Ph.D. Program – Ph.D., Northwestern University; Carnegie Mellon, 1993-

RAYID GHANI, Distinguished Career Professor – Machine Learning, Carnegie Mellon University; Carnegie Mellon, 2002-

GABRIELA GONGORA-SVARTZMAN, Assistant Teaching Professor of Information Systems – PhD in Engineering Management, Stevens Institute of Technology, School of Systems and Enterprises; Carnegie Mellon, 2004-

CHRIS GORANSON, Distinguished Service Professor – Master of Geographic Information Systems, Penn State University; Carnegie Mellon, 2016-

WILPEN GORR, Professor of Public Policy and Information Systems – PhD, Operations Research, Carnegie Mellon University; Carnegie Mellon, 1995-

COREY HARPER, Assistant Professor of Civil and Environmental Engineering – MS in Civil Engineering, MS and PhD, Morgan State University, Carnegie Mellon University; Carnegie Mellon, 2001-

AMELIA HAVILAND, Professor of Statistics and Health Policy – PhD, Statistics and Public Policy, Carnegie Mellon University; Carnegie Mellon, 2004-

EDWARD BARR, Associate Teaching Professor – M.D., University of California at San Francisco School of Medicine; Carnegie Mellon, 2011-

MARK S. KAMLET, Provost, CMU, and H. John Heinz III Professor of Economics and Public Policy – Ph.D., University of California at Berkeley; Carnegie Mellon, 1978-
